Typical uses

Retail stores and spare-parts shops, small warehouses, workshops, events and anywhere boxes or equipment must be lifted to shelf or truck height.

Specifications are nominal and may vary slightly between production batches. Ask the seller to confirm any figure that is critical for your use before buying.

Safety instructions

WARNING: Rated load 300 kg (660 lb). Never exceed it. Never stand or work under a raised load.

General safety

- Read this guide fully before first use. Only trained, authorised adults should operate the machine.
- Never exceed the rated load. Check the load weight before lifting.
- Keep the load centred and stable. Do not lift loose, unbalanced or leaning loads.
- Nobody may stand, walk or work under a raised load, or ride on the machine or the load.
- Use only on firm, level, dry ground. Do not operate on slopes, soft ground or near edges or open pits.
- Keep hands, feet and clothing away from moving parts, the mast, chains and lifting points.
- Lower the load fully before moving long distances, parking or leaving the machine.
- Inspect the machine before every shift. Do not use it if anything is damaged, leaking or not working correctly. Tag it out and get it repaired first.
- Switch off and remove the key / isolate the battery before any cleaning, inspection or repair.
- Charge batteries in a dry, ventilated area away from sparks, flames and smoking.
- Follow all local workplace safety rules and any operator licensing requirements in your country.

Specific to the Mini Pro

- Lift only on firm, level ground with the wheels locked or braked.
- Keep the load centred on the platform/forks and within the rated 300 kg.
- Keep the remote control in your hand while lifting and keep a clear view of the load.
- Do not move the lifter with the load raised. Lower first, then move.
- Never lift people or climb on the lifter.

Operating guide

Before each use: daily checks

- Charge level and charger lead.
- Remote control buttons and battery.
- Wheels, brakes and platform/forks for damage.
- Lifting mechanism moves smoothly with no unusual noise.

How to operate

1. Place the lifter on level ground and lock the wheels.
2. Place the load centrally on the platform/forks.
3. Use the remote control to raise the load to the required height (up to about 950 mm).
4. Transfer the load to the shelf or truck bed, then lower the empty lifter with the remote.
5. Unlock the wheels and move the lifter only when it is fully lowered.
6. Switch off after use.

Battery and charging

- Charge after use or when the lifter slows down. Use only the charger supplied.
- Charge in a dry, ventilated place. Do not charge a damaged battery or cable.

Care and maintenance

- Keep the machine clean and dry.
- Monthly: check bolts, wheels and the lifting mechanism; lubricate moving parts lightly.
- Use only suitable spare parts. Do not modify the machine.

Delivery, unpacking and support

- The machine is delivered in a wooden crate or on a pallet. Inspect the crate on arrival and note any visible damage on the delivery receipt before signing.
- Use suitable lifting equipment to unload the crate. Remove all straps, packing and transport locks before first use.
- Fully charge the battery before first use.
- For questions, spare parts or service help, call or send an enquiry to the seller and quote the model name.

Liftline is a brand of MM Spares Global Pvt Ltd, Faridabad, India. Country of origin of the machine: China.
