

# SAW BLADES

## What we're known for

We offer over a dozen options, including three types of unique teeth for different cutting conditions. Custom blades are our specialty- if your machine type isn't listed, we can still create a blade for you at no extra cost. Using AR (Abrasion Resistant) Plate, our blades cut faster and cleaner than others on the market and last longer as well.

Machine		Width of Cut	
MTC	D	.5"	.5
Ditch Witch	D	.75"	.75
Vermeer	V	1"	1
Tesmec	T	1.5"	1.5
